OUR STORY

It all started with a vision, a vision of giving companies the ability to have an equal playing field to the rest of the world, to source TRUSTED products of high quality and to the standards that companies have come to expect, "second to none" at world wide competitive prices.

It was with this vision, that we formed Unique Global, to supply the international market with quality goods from across the globe. We saw an incredible opportunity to connect international importers directly to manufactures around the globe, creating a trusted network that can expect quality and accountability.

We realised that export hotspots had been created and due to geographical location the price of goods were increasing and quality diminishing at an equally alarming rate, which presented the perfect opportunity to address both these concerns for importers.

Since inception it has been our primary focus to build exceptionally strong partnerships with manufacturers in all sectors based on trust and accountability and ensure that our clients globally get to benefit equally from these partnerships.

Since opening our doors in 2013, we have offices in Hong Kong, Shanghai, Cape Town, Nairobi and Hangzhou where we have our consolidated offices and warehouses.
